BRISTOL WORKSHOP

2015

5TH MARCH

The Bristol Golf Club, St Swithins Park, Blackhorse Hill, Almondsbury, Bristol, BS10 7TP

9.00 - 9.30

Arrival & Registration

9.30 – 10.30

CRRU Update

Tim Bloomer

Tim will be explaining the role of CRRU in the UK SGAR stewardship regime. This presentation will examine the need for stewardship, important dates for stewardship, how the regime was developed and how it will be implemented. The CRRU code of practice, training requirements and monitoring of SGAR residues will also be discussed. The key message is that the professional pest control and local authority sector is in a good position to successfully deliver on stewardship.

10.30 – 11.00

Product Display, Networking & Coffee

11.00 – 11.30

RTN Raising the Game in Bird Control

Jo Trotman and Nigel Batten

This session shows the issues that installers face when considering the correct products for netting projects. With over 50 products available, we look at how these may be considered for your next proofing project by illustrating examples both small and large, as well as the extreme installations that have been installed in the UK.

11.30 – 12.00

Search Engine Optimisation & How to Improve Your Website

Simon Berenyi

Simon will be explaining how business owners and operatives can ignite and apply a new energy to online development.

12.00 – 13.00

Lunch

13.00 – 13.45

Flies & Diseases in Hospitals

Dr Matthew Davies

Matthew will cover aspects of his original research regarding flies and infection in hospitals. The aims of Matthew's thesis were to determine the ability of houseflies to transfer the hospital 'superbug' C. difficile and to collect and identify flying insects in UK hospitals and classify any associated bacteria. His results will be discussed in terms of their relevance to pest control, the principles of which don't just apply to hospitals but fly control in general.

13.45 – 14.00

Aluminium Phosphide Update

What the changes in regulations means to you

Dr Matthew Davies

Matthew will remind attendees about the implications of the training requirements for the use of Aluminium Phosphide for vertebrate control and the steps that users need to take in order to Safeguard their career.

14.00 – 15.30

New Products From The Industry

A chance to hear about the new products from suppliers within the industry.

15.30

Close
