

GB - Effect Microtech CS PRO

Specialized microencapsulated insecticide – concentrate
Two powerful active substances. An extremely long-lasting effect.

Instructors for use: Effect Microtech CS PRO is used to control (disinsect) crawling pests, such as cockroaches (*Blattella germanica*, *Blattella orientalis*), ants (*Monomorium pharaonis*) and bed bugs (*Cimex lectularius*), in places where crawling pests appear/move – along wall cracks, along the lower edges of indoor walls and furniture. Moreover, the product can also be used on the exterior walls of buildings.

The effectiveness of the Effect Microtech CS PRO product is visible within the first 24 hours. Effect Microtech CS PRO should be sprayed immediately after preparation. The product must be shaken before use. Contact with treated surfaces should be avoided after application.

To avoid risks to man and the environment, comply with the instructions for use.

Product effectiveness: Effect Microtech CS PRO achieves an extremely long-lasting effect for up to 6 months due to the special membrane of the microcapsules, which allows for a slower release of the active substance. At the same time, the capsules stick to the insect's body, which makes the insecticide more efficient. Effect Microtech CS PRO contains prallethrin, permethrin and PBO; prallethrin provides a fast action (knock down), permethrin ensures an additional residual action of the agent, and piperonyl butoxide further increases the effectiveness of the preparation. Upon ingestion by and/or contact with an insect, Effect Microtech CS PRO acts on its nervous system.

*Hazardous to bees. *Unprotected persons and animals should be kept away from treated areas until surfaces are dry. *Not to be used on pet bedding, pet sleeping quarters or where pets frequently lie. *Wash hands and exposed skin before meals and after use. *Do not touch treated surfaces until dry. *Avoid excessive contamination of coversalls. *The COSHH (Control of Substances Hazardous to Health) Regulations 2002 (as amended) apply to the use of this product at work. *This material and its container must be disposed of in a safe way. *Do not apply to clothing or human bedding. *Do not contaminate foodstuffs, eating utensils or food contact surfaces. *Keep in a safe place. *All bats are protected under the wildlife and countryside act 1981. Before treating any structure used by bats, consult natural england, scottish natural heritage or the countryside council for Wales. *Cover all water storage tanks before application.

STATUTORY CONDITIONS OF APPROVAL RELATING TO USE. FOR USE ONLY AS AN INSECTICIDE. FOR USE ONLY BY PROFESSIONAL OPERATORS.

Application rate: Smooth surfaces, such as: wood, glass, ceramics: 100 ml of Microtech CS PRO is dissolved in 5 l of water. The prepared solution is sufficient for a surface area of 100 m². Porous surfaces, such as: concrete surfaces: 125 ml of Microtech CS PRO is dissolved in 5 l of water. The prepared solution is sufficient for a surface area of 100 m². To suppress small populations on smooth surfaces, such as: wood, glass, ceramics, 25 ml of Microtech CS PRO is dissolved in 5 l of water. The prepared solution is sufficient for a surface area of 100 m².

Users must comply in full with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all Conditions of Approval.

READ ALL PRECAUTIONS BEFORE USE.
HSE No. 10816

First aid instructions: General instructions/measure: Do not give an unconscious affected person anything to eat or drink. Place the affected person in a lateral position and ensure airway patency. After skin contact: Remove contaminated clothing and footwear. The parts of the body which have come into contact with the preparation, should be washed immediately with plenty of soap and water. Seek medical attention if symptoms occur. In case of eye contact: Immediately rinse open eyes, even under the eyelids, with plenty of running water. Seek medical attention. In case of (excessive) inhalation: Transfer the affected person to fresh air – leave the contaminated area. If symptoms occur, seek medical attention. In case of ingestion: Do not induce vomiting! Rinse the mouth thoroughly with water. In case of doubt or if symptoms occur, seek medical attention. Show the doctor the safety data sheet or label.

Storage: Store in a cool and well-ventilated place. Keep away from food, drinks and animal feedstuffs. Keep out of children's reach.

Instructions for the safe disposal of the biocidal product and its packaging: Product residue disposal: Leave to an authorized hazardous waste collector/disposer/processor. Packaging: Leave the completely emptied packaging to an authorized waste collector.

WARNING

Active substances:

- Permethrin (ISO) 8% (8 g/100 g) CAS No: 52645-53-1;
- Prallethrin (ISO) 1% (1 g/100 g) CAS No: 23031-36-9

May cause an allergic skin reaction. Very toxic to aquatic life with long lasting effects. Repeated exposure may cause skin dryness or cracking. Keep out of reach of children. Do not get in eyes, on skin, or on clothing. Avoid release to the environment. Wear protective gloves/eye protection/face protection. IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container in accordance with national regulation.

Formulation: Microencapsulated concentrate (CS)

User type: The product is intended for professional use.

Date of manufacture, expiry date and batch no.: on the packaging.
