ExHale Dispenser 2.0

User manual. Programmable dispenser for the ExHale aerosol.

The Dispenser 2.0 lets you set exactly when and how often ExHale is released, so the aerosol works through the hours you choose and nothing is wasted outside them. Up to three separate intervals can be programmed for one night.

Control panel, schematic

The buttons

Button	What it does
ON / OFF	Powers the unit. The display shows ON when the unit is powered on and OFF when it is not.
MODE	Steps through the settings: start time, stop time, interval and clock.
HOUR / MIN	Set the value shown on the display.
SPRAY	Test spray. Never point the unit towards yourself or anyone else.
RESET	Press and hold for more than two seconds to clear all settings.

Installing the unit

Step 1	Remove the front cover by pushing the opening mechanism at the back.
Step 2	Remove the head unit by pushing the flap and pushing the unit downwards. Install 2 x D batteries, then refit the head unit.
Step 3	Set the working mode, as described on the next page.

If no button is pressed for 15 seconds during setup, the unit returns to the main interface.

Running overnight? A single interval cannot cross midnight. Split it in two, for example 23:00 to 23:59 and 00:01 to 03:00. See page 2.

BED BUG INNOVATION

Setting the working mode

Set the times first, then the interval, then the clock.

Important: an interval cannot run past midnight

Each interval must start and stop on the same day. If you program one interval from 23:00 to 03:00, **the dispenser will not spray.** Bed bugs are active at night, so most jobs run overnight. Split the run at midnight into two intervals:

If the run does not cross midnight, one interval is enough, for example **14:00 to 23:00** or **00:01 to 04:00**.

Overnight setup, step by step

Example: spraying from 23:00 tonight until 03:00 tomorrow morning.

1	Press **ON / OFF**. The display shows ON.
2	With the display showing ON, hold **MODE** for two seconds to enter the working mode.
3	The display shows **START 1**. Use **HOUR** and **MIN** to set **23:00**. Press **MODE**.
4	The display shows **STOP 1**. Set **23:59**. Press **MODE**.
5	The display shows **START 2**. Set **00:01**. Press **MODE**.
6	The display shows **STOP 2**. Set **03:00**.
7	Press **MODE** until the display shows **INTERVAL**. Press **MIN** to set the minutes between each spray. We recommend **5** (one spray every five minutes) for a room of about 15 m^2.
8	Press **MODE**. The display shows **CLOCK**. Use **HOUR** and **MIN** to set the local time.
9	Press **MODE**. Setup is complete.

Check that it is working

Outside the programmed hours the display shows **STOP**. This is normal. When the clock reaches the start time, the display changes to **START** and the dispenser begins spraying at the chosen interval.

Up to three intervals

Up to three separate periods can be programmed for one night, and none of them may cross midnight. An overnight run uses two of them, leaving one spare, for example **23:00 to 23:59**, **00:01 to 03:00** and **05:00 to 06:00**. For a room of about 15 m^2, we recommend the two-interval setup above with a spray every 5 to 6 minutes.

Installing the aerosol

Fit the can after the working mode is set.

Before installing the aerosol

Check the hammer is not exposed. If the hammer is visible, push it back with a pen or a key before fitting the can. Fitting an aerosol while the hammer is exposed will damage the unit.

Installing the aerosol

Step 4	Install the ExHale aerosol. Make sure the can sits tightly in the snap position.
Step 5	Refit the front cover firmly.
Step 6	Press **SPRAY** to perform a test spray. Never point the dispenser towards yourself or anyone else.
Step 7	Place the unit on the floor, one to two metres from the bed, sofa or suspected harbourage, away from windows and ventilation outlets.

Tip: on parquet or other wooden floors, place the unit on a mat or a piece of cardboard to protect the floor finish.

After the job

Press **ON / OFF** to turn the unit off when the job is done. To clear all settings, hold **RESET** for more than two seconds; you will then need to set the working mode again.

Safety

Extremely flammable aerosol. Do not use near open flames or other sources of ignition. Never point the dispenser towards yourself or anyone else. Remove the aerosol can before transport or storage, and keep the unit out of direct sunlight.
