

PARAFFIN OIL

For use only in the destruction of pest birds' eggs covered by licences issued by the Agriculture and Environment Departments under Section 16(1) of the Wildlife and Countryside Act (1981). Such licences permit the use of the substance otherwise prohibited under Section 5 of the 1981 Act.

The authorities associated with the issuing of licences are: -

Natural England
Scottish Natural Heritage
Natural Resources Wales
Northern Ireland Environment Agency

Contents: 5 Litre

Label Ref: 08/17 Batch No: See Separate Sticker

NOTE:

Please read the Rural Development Service Technical Advice Note 13 – Birds and their control in non-agricultural environments and Natural England Technical Information Note TIN022 – Use of liquid paraffin BP to prevent eggs of certain birds from hatching.

DIRECTIONS FOR USE

This product works by physically blocking the pores in the eggshell. Immerse each egg completely once in paraffin oil as soon as the clutch is complete. Coating of eggs with liquid paraffin can be achieved by immersing each egg of a clutch separately in a container of liquid paraffin whose depth should be sufficient to cover the egg. Each egg should then be rotated in the liquid paraffin to ensure that the entire surface of the shell has been coated. Suitable containers include small buckets and wide-mouthed plastic jars. Excess liquid paraffin should be allowed to drain off the egg before the egg is replaced in the nest. NB. The use of sponges or sprays to coat the egg with liquid paraffin is not recommended as it is easy to miss part of the shell. Removal of the egg from the container by gloved hand will not remove liquid paraffin from the shell.

PRECAUTIONS

If medical advice is needed, have product container or label at hand.
Keep out of reach of children.
Read label before use.

PERSONAL PRECAUTIONS

Wear protective clothing as described below:
Eye protection: tight-fitting safety glasses conforming to EN166 standard.
Hand protection: To protect hands from chemicals wear gloves conforming to EN374 standard.

ENVIRONMENTAL PRECAUTIONS

Do not discharge into drains or watercourses or onto the ground. Spillages or uncontrolled discharges in to watercourses must be reported immediately to the Environment Agency or other appropriate regulatory body.

FIRST AID MEASURES

Ingestion: Rinse mouth thoroughly with water. Do not induce vomiting. Get medical attention if a large quantity has been ingested.
Skin contact: Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if any discomfort continues.
Eye contact: Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues.

SPILLS

Absorb spillage with sand or other inert absorbent. Collect and place in suitable waste disposal containers and seal securely.

DISPOSAL

Dispose of waste to a licensed waste disposal site via a licensed waste carrier. Use EWC code 13 08 99.

This product is not classified according to Regulation (EC) 1272/2008
