Sakar® BRODIFACOU M GEL

FOR TRAINED PROFESSIONAL USE ONLY

Contains Brodifacoum (0.005% w/w)

GB. Ready-to-use rodenticide gel bait (product type 14) for the control of house mice and brown rats indoor and outdoor around buildings. To be used only by professional users holding certification demonstrating compliance with UK rodenticide stewardship regime requirements. Read the label before use. Using this product in a manner that is inconsistent with the label may be an offence. Refer to the CRRU UK Code of Best Practice (or equivalent) for guidance. When this product is supplied to a user for the control of rodents, it shall only be supplied to a professional user holding certification demonstrating compliance with UK rodenticide stewardship regime requirements

IE. Ready-to-use gel bait containing Brodifacoum (0.005% w/w) for use as a rodenticide by Trained Professionals for the control of rats and mice indoors and outdoors around buildings for the protection of public health, stored products and materials.

**Use Biocides Safely and Sustainably.
It is illegal to use this product for uses or in a manner other than that prescribed on this label.**

SAKARAT BRODIFACOU M GEL

Ready-to-use rodenticide gel bait (product type 14)
Contains: Brodifacoum
(CAS N° 56073-10-0) 0.005% w/w
UFI: S800-F0JK-600Y-NCFY (IE only).

HAZARD STATEMENTS

H360D May damage the unborn child.
H373 May cause damage to organs (blood) through prolonged or repeated exposure.

PRECAUTIONARY STATEMENTS

P201 Obtain special instructions before use. P202 Do not handle until all safety precautions have been read and understood. P280 Wear protective gloves. P308+P313 If exposed or concerned: Get medical advice/attention. P314 Get medical advice/attention if you feel unwell. P405 Store locked up. P501 Dispose of contents/container in accordance with local regulation.

FEATURES:

SAKARAT BRODIFACOU M GEL is a ready-to-use gel bait in tube for the control of house mice (*Mus musculus*) and brown rats (*Rattus norvegicus*) at all development stages, containing a highly potent compound, brodifacoum, a single-feed, second-generation anticoagulant active ingredient. Thanks to its mode of action, the rodents' death occurs without rousing suspicion towards the bait by the other members of the colony. SAKARAT BRODIFACOU M GEL contains a mixture of food origin components palatable for the above-mentioned species. This formulation has been studied to optimize its use under a wide temperature range as it maintains its physical and chemical characteristics unchanged once applied. Thanks to these features, the gel is indicated to be used in and around buildings of civil, industrial and rural environments. In particular in rural and zootechnical environments it is recommended to place bait points in elevated areas along the rodents walkways. SAKARAT BRODIFACOU M GEL incorporates a bittering agent (Denatonium Benzoate) to help prevent human consumption.

INSTRUCTIONS FOR USE:

[GB] Category of users: professional users with demonstrated competence (equivalent to trained professionals).

[IE] Category of users: trained professionals.

Application method: ready-to-use bait to be used in tamper-resistant bait stations or in covered and protected baiting points.

[GB] Tamper-resistant bait stations must be:

- Strong enough to prevent entry or destruction by dogs.
- Strong enough to prevent entry or destruction by children under six years of age using hands, feet or objects reasonably expected

to be available in the use area (indoor: e.g. household objects, toys etc.) - (outdoor: e.g. sticks, stones etc.).

- **Lockable or sealable so that children and dogs cannot gain access through the opening or mechanisms used to fill the bait compartments.**
- **Resistant to destruction or weakening from exposure to typical non-catastrophic weather (e.g. direct sunlight, extremes of temperature and humidity, rain, snow etc); for outdoor around buildings use.**

Insert the tube inside the caulking gun; cut a hole in the conical tip of the tube and insert the nozzle. Cut the nozzle above the screw thread taking care not to damage the thread itself, then dispense the product. Once finished, screw the protecting cap and loosen the pressure of the caulking gun in order to prevent loss of the product. Keep the tube upside down. Store away from heat.

APPLICATION RATES AND FREQUENCY:

For the control of house mice (*Mus musculus*) - indoor and outdoor around buildings uses:

- High infestation: 50 g of bait per baiting point spaced 2m apart;
- Low infestation: 50 g of bait per baiting point spaced 5m apart;

For the control of brown rats (*Rattus norvegicus*) - indoor and outdoor around buildings uses:

- High infestation: 100 g of bait per baiting point spaced 5m apart;
- Low infestation: 100 g of bait per baiting point spaced 10m apart;

Remove the remaining product at the end of treatment period.

[IE] Follow any additional instructions provided by the relevant code of best practice.

For outdoor around buildings use; protect bait from atmospheric conditions. Place the baiting points in areas not liable to flooding. Replace any bait in baiting points in which bait has been damaged by water or contaminated by dirt. Baiting points must be covered and placed in strategic sites to minimise the exposure to non-target species.

Shelf-life: 2 years from its manufacturing date.

Contains: Silicon dioxide (CAS N°7631-86-9) 4.5% w/w

Batch n° and manufacturing date: see stamp

NOT TO BE SOLD SEPARATELY
